

Cricket Player Performance Tracking

Application : CRICKSTATS

User Story:

As a Salesforce Admin, I want to create a comprehensive player performance tracking application in Salesforce to manage cricket player information and match-by-match performance data. The application will use custom objects such as **Player** and **Match Performance** with carefully defined fields to store relevant information accurately. Relationships between these objects, including **Master-Detail** and **Lookup relationships**, will help maintain data consistency and make records easily accessible. The system will allow administrators to efficiently create, update, and manage player and match performance records. It will also support reporting and analytics to analyze individual and team performance. Reports and dashboards will provide useful insights into player statistics and performance trends. Overall, the application will provide a structured platform for managing cricket performance data and support better data-driven decisionmaking.

1. INTRODUCTION

1.1 Project Overview :

CRICKSTATS is a Salesforce-based application designed to track, manage, and analyze cricket players' performance on a match-by-match basis. The system uses custom objects, relationships, dashboards, and automation tools to provide structured performance insights.

It enables coaches, analysts, and administrators to record player statistics, generate reports, and support strategic decision-making.

1.2 Purpose :

The main purpose of this project is:

- To digitize player performance records
- To improve accuracy and accessibility of cricket statistics
- To provide real-time analytics

- To support player development and team planning
- To automate data management using Salesforce

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A cricket team coach	Track player performance across matches	I cannot get accurate statistics easily	Data is stored in different files and formats	Frustrated and unsure about team selection
PS-2	A team manager	Maintain complete player records	It takes too much time to update and verify data	Most records are maintained manually	Stressed and inefficient
PS-3	A sports analyst	Analyze player trends and generate reports	I face difficulty in comparing performances	There is no centralized analytics system	Confused and dissatisfied

A cricket team coach

PS-1

A cricket team coach

I am: Track player performance across matches

But: I cannot get accurate statistics easily

Because: Data is stored in different files and formats

Frustrated and unsure about team selection

A team manager

PS-2

A team manager

I am: Maintain complete player records

But: It takes too much time to update and verify data

Because: Most records are maintained manually

Frustrated and unsure about team selection

A sports analyst

PS-3

A sports analyst

I am: Analyze player trends and generate reports

But: I face difficulty in comparing performances

Because: There is no centralized analytics system

Confused and dissatisfied.

2.2 Empathy Map Canvas

Target Users

- Team Managers
- Coaches
- Analysts
- Salesforce Admins

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate data, better insights
Hear	Feedback from management
See	Multiple data sources
Say & Do	Collect statistics manually
Pain	Data errors, delays
Gain	Faster decisions, automation

2.3 Brainstorming

Brainstormed Ideas

- Web-based player management system
- Mobile statistics tracker
- Salesforce-integrated CRM
- AI-based performance prediction
- Dashboard-based analytics

Selected Idea: Salesforce-based performance tracking platform (CRICKSTATS)

Brainstorming

Web-based player management system

Mobile statistics tracker

Salesforce-integrated CRM

AI-based performance prediction

Dashboard-based analytics

Selected Idea

Salesforce-integrated CRM

Mobile statistics tracker

Selected Idea:

Salesforce-based performance tracking platform (CRICKSTATS)
